

Sprint Review

PROJECT NAME	Dugbet	Sprint	Sprint 1
TEAM	Group 3	DATE	02/11/2023

Member attendance:

- Huynh Huu Phuc
- Tu Canh Minh
- Nguyen Duc Hung
- Hoang Nhu Vinh
- Nguyen Truc Nhu Binh

What went well?	What went wrong?
<ul style="list-style-type: none">o Team members fully and punctually attend meetingso Complete documents that are required for the current PAo Reach out some progress on tasks for the following PA(s) (UI prototype, code, database brainstorming)o Follow the progress of the projecto Complete most tasks of the sprint (>80%)	<ul style="list-style-type: none">o The team finds it difficult to implement since documents such as use cases and UI prototypes are defined in later sprints.o Lack of connection between team memberso Stuck in ordering tasks (which should be completed first) and smoothing the workflow.
What problems or caused the problems?	What can be done differently in the next sprint to improve the project?
<ul style="list-style-type: none">o The meeting is only being held online, so interaction may still be limited.o Personal schedules or issues may impact the progress of the project.	<ul style="list-style-type: none">o Organize the offline meeting.o Create draft look-ahead documents in advance sprints to clarify the design and application flow.

What we could learn:

- How to list the necessary requirements for the project.
- How to hold and arrange the features according to priority.
- How to analyze features based on user requirements and system requirements.
- How to apply an agile framework (RUP + Scrum).
- how to use Jira to manage and see the process of the process.
- how to use Figma to design the pattern UI for the project
