 - Design and add app icon
 - Issues/Obstacles
 - prototype - time consuming for UX

b. Actions (if any)

- Unify the naming convention for GitHub branches and commit

c. Summary

- Assigning task
- Monitor the project's progress

d. Plan for the following weekly meet with TAs

Attendance in LAB: Như Vinh, Đức Hưng

Questions for the TAs in the lab:

- Phân biệt giữa exception flow và alternative flow

- Records expense (thêm transaction trong group) vs add transaction (feature cơ bản) có điểm tương đồng trừ việc Records expense có chọn người thành viên tham gia
thay thế: trong add transaction chọn personal hoặc event ? -> chỉ cần 1 use case add transaction
