

# Weekly Meeting Note 1

Sprint 2 - Nov 8th 2023

Platform: Offline meeting

## 1. Attendees

- Nguyen Truc Nhu Binh
- Hoang Nhu Vinh
- Tu Canh Minh
- Nguyen Duc Hung
- Huynh Huu Phuc

## 2. Agenda

### **a. Status reports:**

- Huynh Huu Phuc
  - Completed tasks
    - Update splash screen
  - To-do task
    - Use case specifications:
      - Use case specification
      - login
      - sign up
      - forget password
      - logout
      - buy premium
      - make payment
      - view statistic
      - manage financial goal
    - Learning Figma prototype
    - Weekly report document

- Draw gantt chart
- Nguyen Duc Hung
  - Completed tasks
    - Implement double notch widget
  - To-do task
    - Use case specifications:
      - initialize wallet balance
      - transfer between wallets
      - modify profile
      - set display configuration
    - Architect document draft
    - Learning figma prototype
- Hoang Nhu Vinh
  - Completed tasks
    - database: UML Schema (class diagram)
  - To-do task
    - database: Data example model
    - Use case specifications:
      - view transaction
      - add transaction
      - add new category
      - scan bill
    - Firebase setup
    - Leaning Figma Prototype
- Tu Canh Minh
  - To-do task
    - Use case specification:
      - initialize event
      - add member to event
      - end event

- add event transaction
  - Learning Figma prototype
- Nguyen Truc Nhu Binh
  - Completed tasks
    - General user flow
  - To-do task
    - prototype login screen
    - prototype home
    - Figma prototype guiding
    - Demo convert figma to flutter (Dhiwise)
    - Design UI (wallet-page)
    - Design and add app icon

## **b. Action**

- Recheck PA02 task
- Work together to define all use cases
- Check unfinished tasks in the previous sprint 1 and merge with tasks in sprint 2: Database design, UI design ( + UI prototype), Code (front-end)

## **c. Summary**

- Monitor project's progress
- Assign more tasks
- Decide workflow: Prioritize use-case model, must be finished before building the database structure
- Review Feature Requirements: Rename public and private account profile -> public account and private access
- Build Use-case model: introduce FigJam and basically how to use it (draw diagrams, team's work zone,...)
